PROFESSIONAL SUMMARY

Strategic **Product Owner and Technical Business Analyst** with **16+** years of experience delivering enterprise-scale digital transformation initiatives across **Banking, Capital Markets, Investment Banking, Payments, Retail Banking, FinTech, Supply Chain, Insurance, and AI-powered platforms**. Proven expertise in defining product vision, leading product discovery, translating complex business requirements into scalable technical solutions, and delivering customer-centric digital products using Agile methodologies.

Extensive experience collaborating with C-level executives, business stakeholders, engineering teams, architects, and cross-functional global teams to drive innovation, optimize operational efficiency, and accelerate product delivery. Strong background in AI product strategy, cloud technologies, API integrations, data analytics, and enterprise modernization across regulated industries.

Certified PMP®, CSPO®, PMI-ACP®, SAFe®, AWS Cloud Practitioner, Lean Six Sigma Black Belt, and Duke University Product Management (AI & Growth), with a proven ability to deliver measurable business outcomes through strategic product leadership and data-driven decision-making.

EXPERIENCE

GENPACT
Noida, India

Principal Consultant

10/2025 to Current

Project: AML Data Intelligence & Financial Crime Compliance Platform and Retail baning / Supply chain risk management to mitigation

- **Led AI product strategy and roadmap** for enterprise Banking, Retail Banking, AML, and Supply Chain transformation initiatives, collaborating with Product, Data Engineering, AI/ML, and Platform teams.
- **Delivered GenAI solutions** leveraging LLMs, RAG, MCP, Agentic AI, AI Copilots, and Prompt Engineering to automate business workflows, decision support, and knowledge retrieval.
- **Designed AI-powered AML platforms** for transaction monitoring, sanctions screening, KYC, customer risk profiling, and SAR automation, reducing investigation effort by **35%**.
- **Built intelligent Supply Chain solutions** for demand forecasting, inventory optimization, procurement, sourcing, logistics, and risk mitigation using predictive analytics and AI agents.
- **Modernized Retail Banking products** by integrating AI-powered customer onboarding, lending, fraud detection, payments, and personalized digital banking experiences.
- **Partnered with Data Engineering and AI teams** to develop scalable data pipelines, vector databases, feature stores, enterprise APIs, and cloud-native AI architectures.
- **Owned product discovery, roadmap planning, backlog prioritization, stakeholder management, and Agile delivery**, translating business needs into scalable AI-enabled products.
- **Established Responsible AI governance** through explainability (XAI), model evaluation, prompt optimization, compliance, and AI performance monitoring aligned with global banking regulations.
- **Technologies:** GPT-4, Azure OpenAI, LLMs, RAG, MCP, Agentic AI, LangChain, SQL, REST APIs, Azure, Power BI, Jira, Confluence, SAP, Kinaxis.

COFORGE, INDIA
Gr. Noida, India

Business Solution Consultant / BA/ Product Owner

05/2023 to 09/2025

- Led AI-driven product strategy and roadmap for **UK Post Office, Retail Banking, Wholesale Banking, Treasury, Payments, Trade Finance, and Investment Banking (Apex)** modernization initiatives.
- Partnered with business stakeholders, Data Engineering, AI/ML, and Solution Architecture teams to deliver AI-powered banking products using **LLMs, RAG, MCP, Agentic AI, and AI Copilots**.
- Defined AI use cases for intelligent document processing, regulatory reporting, transaction monitoring, payment operations, fraud detection, customer servicing, and compliance automation.
- Designed enterprise data integration across **Oracle FLEXCUBE, Murex, Trade360, ACBS, Finastra GPP, Kafka, IBM MQ, and MuleSoft**, enabling real-time banking insights and scalable APIs.

- Developed AI-assisted data models, semantic knowledge layers, vector-enabled search, and automated regulatory reporting to improve decision-making and operational efficiency.
- Collaborated with engineering teams to build secure, cloud-native microservices, enterprise APIs, and AI orchestration workflows integrating legacy and modern banking platforms.
- Established AI governance, explainability (XAI), prompt evaluation, model monitoring, and regulatory compliance aligned with **FCA, FATF, AML, KYC, Basel III, and Open Banking** standards.
- Managed product discovery, roadmap prioritization, Agile delivery, stakeholder engagement, and KPI-driven product outcomes, improving reporting accuracy by **30%** and reducing operational effort through AI-enabled automation.

ANALEC INFOTECH

Gurugram, Haryana

Principal Consultant

12/2022 to 03/2023

Project: Investment Banking Research & Reporting Platform

Responsibilities:

- Collaborated with business stakeholders, research analysts, portfolio managers, and Data Engineering teams to define product vision, business requirements, and AI-driven reporting capabilities.
- Led product discovery and roadmap execution for an **AI-powered investment banking research and reporting platform**, supporting equity research, portfolio management, and financial analytics.
- Designed intelligent reporting workflows leveraging **LLMs, AI-assisted research, predictive analytics, and semantic search** to accelerate investment insights and automate report generation.
- Defined enterprise data models, reporting frameworks, and API integrations for market data, financial statements, risk metrics, and downstream publishing platforms.
- Created user stories, UML diagrams, process flows, acceptance criteria, and functional specifications to support Agile product delivery.
- Partnered with AI/ML teams to implement data quality validation, anomaly detection, and automated reconciliation, improving reporting accuracy and operational efficiency.
- Managed product backlog, stakeholder workshops, UAT, release planning, and production deployments while ensuring regulatory compliance and data governance.

KELLTONTech SOLUTION

Gurugram, India

Manager- Product Owner

12/2021 to 09/2022

Project: Loan Origination & Lending Data Platform

Domains: Investment Banking | Retail Banking | Digital Payments | Lending | Insurance

Responsibilities:

- Led product discovery, roadmap planning, and business analysis for enterprise platforms across **Investment Banking, BharatPe Digital Payments, Retail Banking, Loan Origination (LOS), Loan Management System (LMS), and Insurance** solutions.
- Partnered with business stakeholders, architects, engineering, and QA teams to gather requirements, prioritize product backlogs, and deliver customer-centric financial products using Agile methodologies.
- Designed end-to-end retail lending journeys covering customer onboarding, e-KYC, credit assessment, underwriting, loan origination, repayment schedules, collections, and loan servicing for retailers and SMEs.
- Collaborated with Data Science teams to define **Machine Learning** use cases for credit risk assessment, fraud detection, customer segmentation, loan eligibility prediction, and payment behavior analysis.
- Delivered **BharatPe** merchant solutions supporting digital onboarding, QR-based payments, merchant settlements, transaction reconciliation, and payment gateway integrations.
- Built Investment Banking research and reporting capabilities by defining business processes, reporting models, financial data structures, dashboards, and regulatory reporting workflows for research analysts and portfolio managers.
- Developed an Insurance Agent Management Platform supporting policy issuance, premium collection, claims processing, customer servicing, agent onboarding, and performance reporting for government and enterprise insurance programs.
- Authored BRDs, FRDs, user stories, process flows, UML diagrams, API specifications, and acceptance criteria while coordinating UAT, production releases, and stakeholder sign-offs.
- Improved operational efficiency, reporting accuracy, and customer experience by implementing workflow automation, data quality controls, API integrations, and analytics-driven business insights.

Environment: SQL, REST APIs, JSON, Postman, Jira, Confluence, Power BI, Tableau, Oracle, MySQL, Agile Scrum.

DOODHBHANDAAR PVT LTD

Jhansi, India

Product Manager

07/2018 to 07/2020

Project AI ML Powered Financial Management & Market Intelligence Platform for Farmers

- Led the product strategy and roadmap for an **AI-powered financial management platform** enabling farmers to track profitability, cash flow, crop performance, and business growth.
- Defined ML-driven use cases for **crop yield prediction, price forecasting, demand analysis, and personalized financial insights** using historical and real-time market data.
- Collaborated with Data Engineering and ML teams to build predictive models for **market trends, revenue forecasting, expense optimization, and risk assessment**.
- Designed AI-powered dashboards providing real-time KPIs, profit/loss analysis, subsidy tracking, inventory management, and regional market intelligence.
- Integrated weather, commodity prices, satellite data, and government schemes to deliver actionable recommendations and improve farming decisions.
- Managed product discovery, stakeholder workshops, roadmap prioritization, backlog management, and Agile delivery across cross-functional teams.
- Improved financial planning accuracy and enabled data-driven decision-making through ML-powered forecasting and intelligent business analytics.

JOLT ONLINE PVT LTD (ASKJOLT.COM)

Mumbai, India

Product Manager

09/2015 to 09/2017

ANGLO EASTERN SHIP MANAGEMENT

Mumbai, India

Project Manager

12/2009 to 06/2015

- Led and motivated project team to meet and exceed project KPIs.
- Managed client expectations through a professional approach, ensuring alignment with project goals and deliverables.
- Reviewed performance against targets, identifying and managing risks and opportunities to enhance project outcomes.
- Built collaborative relationships with project teams to foster effective communication and support project success.
- Delivered presentations and briefings to senior teams and incorporated changes into project workflows.

CORE QUALIFICATIONS

CORE SYSTEM ANALYSIS, BANKING & DATA DOMAIN SKILLS

- System Analysis & Business Analysis
- Requirements Gathering & Analysis
- Functional & Technical Specifications
- BRD, FRD, SRS, CR Documentation
- Solution Design & Architecture Support
- Business Process Modelling
- UML Diagrams (Use Case, Activity, Sequence Diagrams)
- Data Flow Diagrams (DFD)
- Gap Analysis & Impact Assessment
- Stakeholder Management
- Workshop Facilitation
- User Stories & Acceptance Criteria
- Requirement Traceability Matrix (RTM)
- Functional Testing & UAT Support

AI Product Strategy

- Generative AI, LLMs, Agentic AI, RAG, MCP, Machine Learning,
- AI Agents, Prompt Engineering, Vector Databases, Intelligent Automation,
- AI Governance & Enterprise AI Solutions

Wholesale Banking & Financial Services Domain

- Wholesale Banking
- Corporate Banking
- Retail Banking
- Global Markets
- Treasury & Liquidity Management
- Trade Finance

Data Analysis & Data Domain Expertise

- Data Modelling
- Teradata FSDM Concepts
- Dimensional Data Modelling
- Data Mapping & Data Lineage
- Data Governance
- Data Quality Management
- Metadata Management
- Master Data Management
- Data Profiling
- Data Validation & Reconciliation
- Reporting Tables Design
- Data Warehousing Concepts
- Enterprise Data Architecture
- Source-to-Target Mapping (STTM)
- Data Migration & Transformation

Database & Querying Skills

- SQL Query Development
- Data Validation Scripts
- Data Reconciliation Queries
- MySQL
- PostgreSQL
- MongoDB
- ETL Analysis
- Data Integrity Checks
- Reporting & Analytics

Integration & Technical Architecture

- REST APIs
- SOAP Services
- XML / JSON / XSLT

- Cash Management
- Transaction Banking
- Capital Markets
- Investment Banking
- Core Banking Operations
- Loan Origination & Loan Management Systems
- Deposit & CASA Products
- Payment Processing & Settlements
- SWIFT, ACH & ISO 20022
- Trade Lifecycle Management
- Treasury Operations
- Regulatory Reporting
- AML / KYC / CFT Compliance
- Fraud Risk Management
- RBI, FATF, Basel & Compliance Frameworks

Core Banking & Banking Platforms

- Oracle FLEXCUBE
- Murex Treasury Platform
- Trade360 Trade Finance
- ACBS (FIS)
- Finastra GPP
- Temenos
- Finacle
- Mambu
- Bloomberg
- Reuters (Refinitiv)
- Calypso

- API Design & Integration
- Core Banking Integrations
- Enterprise Service Bus (ESB)
- IBM MQ
- Kafka
- JMS
- MuleSoft
- TIBCO
- Event-Driven Architecture
- Microservices Architecture
- OAuth2 & TLS Security
- API Gateway Solutions

Testing, Validation & Quality Assurance

- Functional Testing
- SIT & UAT
- Data Validation Testing
- End-to-End Integration Testing
- Reconciliation Testing
- Regression Testing
- Smoke Testing
- Defect Management
- Production Support
- Incident Resolution
- Root Cause Analysis
- SLA Management

Agile Delivery & Leadership

- Agile Scrum Methodology
- SAFe Framework
- Sprint Planning
- Backlog Grooming
- Sprint Reviews & Retrospectives
- Cross-Functional Team Leadership
- Stakeholder Communication
- Delivery Governance
- Risk & Dependency Management

Tools & Technologies

- Jira
- Confluence
- Azure DevOps
- ServiceNow
- Figma
- Instagantt
- AWS Cloud
- Azure Cloud
- Snowflake
- Power BI
- Tableau
- Postman
- Swagger
- Selenium
- CI/CD Tools

AI & Advanced Analytics

- Generative AI
- AI-Assisted Business Analysis
- Document Intelligence
- Requirement Automation
- Transaction Monitoring Analytics
- AML Analytics
- Predictive Analytics
- Machine Learning Concepts
- Deep Learning Concept

ACCOMPLISHMENTS

- Represented school for cyber olympiad
- Interviewed on TV for the startup Doodhbhandaar “Upgrading farmers potential by new technologies” 2
- Interviewed on Web At IIT Kanpur for startup Doodhbhandaar
- <https://www.youtube.com/watch?v=MgiR9fHTZCg&t=9s> 3
- Selected in top 21 startups in Indian Agriculture research institute program “ PUSA KRISHI” 4
- Selected in IIT Kanpur in top 10 startups, Program “ Startup Master Class” 5
- Runners up at Indian Institute of Management - Udaipur Incubation program “Cohort and ZOOM” 6
- Awarded as YOUNGEST SEAFARER ENTREPRENEUR in Award Function Sailor today while working with www.askjolt.com
- Coforge :- Awarded with the outstanding performance in a cohort
