PROFESSIONAL SUMMARY

Strategic Banking & FinTech Product Leader with 16+ years of experience (including 11+ years in end-to-end Product Management) delivering enterprise-scale platforms across Core Banking, Investment Banking, Payments, and Payment Gateway ecosystems in the USA, UK, and India. **Certified PMP, AWS Certified Cloud Practitioner, SAFe® 6.0 Agilist, and CSPO**, bringing a strong blend of product leadership, agile execution, and cloud-driven transformation expertise. Extensive domain expertise in Real-Time Payments (RTP), ACH, SWIFT, SEPA, card issuing & acquiring, ISO 20022 readiness, AML/KYC, transaction monitoring, Open Banking (PSD2), and regulatory-driven architectures aligned with RBI, FCA, and MiFID II frameworks. Proven track record of leading cloud-native core banking modernization initiatives across Temenos, Oracle FLEXCUBE, Mambu, and Finacle environments—driving API-led integrations, microservices enablement, high-availability payment processing, and legacy-to-cloud migrations. Successfully delivered scalable, compliant financial platforms improving operational efficiency by 25–40%, reducing payment latency by 35%, accelerating loan underwriting cycles by 70%, and strengthening fraud and risk controls through AI-driven monitoring systems. Strong expertise in product strategy, regulatory-first design, stakeholder governance across business, risk, and compliance teams, Agile delivery at scale, and architecting secure, scalable financial infrastructure for high-volume banking and payment ecosystems.

EXPERIENCE

GENPACT

Noida, India

Principal Consultant

10/2025 to Current

Leading AI-driven transformation initiatives in Banking and Financial Crime Compliance, focused on next-generation AML modernization using Generative AI and intelligent automation.

Key Responsibilities & Impact:

GenAI-Enabled AML Transformation Platform (Global Banking Client)

- Leading product strategy and roadmap for AI-powered AML case investigation and transaction monitoring modernization.
- Designed and implemented GenAI-based narrative generation engine to automate Suspicious Activity Report (SAR) drafting and compliance documentation.
- Reduced manual case investigation effort by ~35% through AI-assisted risk summarization and anomaly explanations.
- Improved alert triage accuracy and false-positive reduction through LLM-based contextual transaction analysis.
- Integrated AI explainability layer to ensure audit readiness and regulatory transparency (aligned with FATF, RBI, FCA guidelines).

COFORGE, INDIA

Gr. Noida, India

Business Solution Consultant / BA/ Product Owner

05/2023 to 09/2025

- Led end-to-end requirements gathering and analysis for Investment Banking and Capital Markets initiatives, collaborating with traders, risk teams, compliance, operations, and technology stakeholders to define clear business needs.
- Conducted feasibility studies, market risk assessments, and regulatory impact analysis (MiFID, Basel, AML/KYC) to identify potential issues and opportunities, ensuring alignment with front-office and middle-office objectives.
- Developed detailed BRDs, FRDs, trade lifecycle process flows, and user stories covering areas such as trade booking, settlements, reconciliations, risk reporting, and regulatory reporting.
- Acted as a key bridge between business stakeholders and technology teams, ensuring clarity in requirements for trading systems, market data platforms, order management systems (OMS), and downstream reporting tools.
- Performed business process modeling across the full trade lifecycle—front-office execution, confirmation/clearing, risk checks, collateral, and settlements—while recommending process improvements to enhance STP (Straight-Through Processing) and reduce operational risk.
- Demonstrated strong leadership in driving cross-functional collaboration, fostering transparency, ensuring timely communication, and maintaining alignment across global teams in fast-paced capital markets.

environments.

ANALEC INFOTECH
Gurugram, Haryana

Product Manager/ Sr Business Analyst

12/2022 to 03/2023

- Worked on designing and enhancing Investment Banking tools that allow analysts to **upload research documents, automate approvals, and route content to relevant product houses and compliance teams**, improving turnaround time and transparency.
- Contributed to key products at **Analec Infotech**, including *ResearchWise*—a sell-side research publishing platform used by global Investment Banks for generating, reviewing, and distributing equity research reports.
- Participated in **retail and corporate banking mobile app interface development**, translating customer requirements into intuitive digital experiences for large banking clients.
- Interacted directly with global clients to gather business requirements, conduct **gap analysis**, and ensure alignment with SLAs and delivery milestones.
- Provided leadership across **architecture, design, build, and run phases** of cloud-based banking applications with a focus on application modernization and platform scalability.
- Prepared detailed **functional documents**, including EPICs, modules, user stories, RFPs, RFBs, and requirement traceability artifacts for development and stakeholder visibility.
- Collaborated frequently with **cross-functional teams**, including DevOps, QA, engineering, and data migration specialists to support end-to-end product delivery.

KELLTONTech SOLUTION
Gurugram, India

Manager- Product Owner
Clients handled

12/2021 to 09/2022

Maxlife Insurance, Vestige, Adani and Bharat pe
